PRODUCT DETAILS

The DAB 151nXtP is a rugged cast iron, twin impeller, self-priming, surface mounted jet pump suitable for use in a wide range of applications and especially where there is the requirement to lift water from the source.

The distinctive front casting contains a jet and venturi which provides suction capability of up to 8m.

Supplied with the innovative dual mode nXtP controller this combination is ready to provide years of reliable operation.

APPLICATIONS

- Supplying water to domestic installations
- Ideal for use in small-scale agriculture or horticulture
- Pressure boosting, irrigation, wash down or other limited industrial services
- Situations where self priming operation is necessary
- Designed for pumping from tanks, rivers and dams where air bubbles or small particles of sand are present

FEATURES

- Self priming centrifugal pump with excellent suction capability
- 240V single phase TEFC motor with in-built auto reset thermal overload to prevent pump from damage
- The nXtP dual mode controller has an inbuilt check valve and dry run (no flow) protection

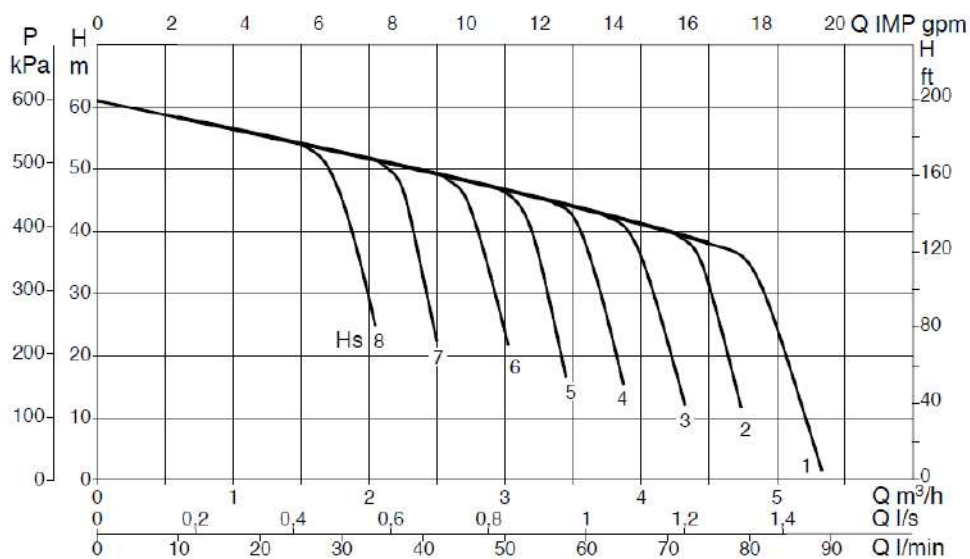

To protect the pump from excessive cycling and to isolate from the effects of water hammer, adding a pressure tank to the system is highly recommended
