

## New Product release: High Voltage motors

Franklin Electric, the global leader in submersible motor design and manufacturing is pleased to announce an extension to our motor product lines by offering High Voltage winding motors.

### 1,000 volts

### 2,300 volts

### 3,300 volts

High Voltage motors are suitable for many diverse industrial and mining applications. As the voltage increases so the amps decrease allowing smaller diameter drop cable, thus potentially lowering site cable costs.

High Voltage motors are available in our Rewindable design covering 6" through to 12" motors.

- Mining
- Industrial
- Offshore
  
- **18 kW to 400 kW**
- **6", 8", 10" and 12" Rewindable motors**
- **Std 304, 316SS and 904L constructions**
- **1,000V – 2,300V – 3,300 volts 50 Hz, DOL**
- PE2+PA winding materials. Flow and temperature limits apply.

Your Franklin Area Sales Manager can assist with any questions and sizing for High Voltage motors applications.
